

Connecticut Energy Efficiency Board

**2017 Update to the 2016-2018 Conservation and Load Management Plan
Public Input Session**

**Wednesday June 8, 2016, 1:00 – 4:00 pm
10 Franklin Square, New Britain, CT – Hearing Room 1**

The Connecticut Energy Efficiency Board (EEB) cordially invites you to a public input session for the 2017 Update to the 2016-2018 Conservation and Load Management Plan. The session will be held Wednesday, June 8, 2016, 1:00 - 4:00 pm at 10 Franklin Square in New Britain, CT (Hearing Room 1).

The EEB welcomes input as part of its collaborative process with utility companies, the Department of Energy and Environmental Protection (DEEP), the CT Green Bank, interested stakeholders and the general public, for developing the 2017 Update to the 2016-2018 Conservation and Load Management Plan (Update). The Update will provide recommendations to the DEEP and the Public Utilities Regulatory Authority about the allocation of Connecticut Energy Efficiency Fund resources for energy efficiency programs and related activities. The EEB is interested in receiving public comments on what should be included in the Update, and on what key issues the EEB should take into consideration in developing the Update. The current three-year Plan (2016-2018) and related information may be found online at: <http://energizect.com/about/eeboard/plans>.

Established through CGS 16-245m, the EEB is comprised of ten voting members representing business and consumer interests as well as state agencies, and five non-voting representatives of the state's electric and gas utilities. It advises and assists the utilities in the development and implementation of Connecticut's energy efficiency and load management plans.

There is no formal advance registration. However, to facilitate planning, please confirm your intention to attend by emailing Craig Diamond, the EEB's Executive Secretary, **by Friday, June 3**. His contact information is below on the second page of this letter.

A record of public input becomes part of the Plan itself. Therefore, it is very important that commenters provide written input, preferably in advance of the session. Presentations during the public input session should be **no longer than seven minutes**. Please email electronic copies of your remarks, and/or a PowerPoint presentation if you plan to use one, **by Friday, June 3** to Craig Diamond.

Executive Secretary Contact Information:

Craig Diamond

craig.diamond@energizect.com

The Board looks forward to hearing from you during the public input session. If you have any questions, please contact Craig Diamond.

Sincerely,

A handwritten signature in blue ink, appearing to read "Bill Dornbos".

Bill Dornbos, Chair
Connecticut Energy Efficiency Board

About the Connecticut Energy Efficiency Fund

The Energy Efficiency Fund promotes efficient energy use, helps residents and businesses save on their electric and natural gas bills, advances economic development, reduces electric demand, and helps reduce air pollution. Energy Efficiency Fund programs serve residential customers, including limited-and fixed-income customers, as well as business and municipal customers. Connecticut's energy efficiency programs are funded by a charge on customers' utility bills and administered by the state's electric and gas utilities including: Eversource (previously Connecticut Light and Power and Yankee Gas), The United Illuminating Company, Connecticut Natural Gas, and Southern Connecticut Gas. Additional information on Connecticut's energy efficiency programs can be found at [EnergizeCT.com](http://www.energizect.com) or by calling 1-877-WISE-USE. The Fund's Annual Reports on Fund supported program activities and results may be viewed at: <http://www.energizect.com/annualreports>.

About Energize Connecticut

Energize Connecticut helps you save money and use clean energy. It is an initiative of the Energy Efficiency Fund, the Connecticut Green Bank, the State, and your local electric and gas utilities, with funding from a charge on customer energy bills. Information on energy-saving programs can be found at [EnergizeCT.com](http://www.energizect.com) or by calling 1.877.WISE.USE.
