

Empowering you to make smart energy choices

“We produce energy-efficient lighting products so we understand the necessity of taking energy conscious steps in any facility renovation or new building project.”

Allison Walker, Chairman, CEO, The Lighting Quotient.

“When our own HVAC system failed, the Energize Connecticut Fund stepped in and made it possible for us to “walk the walk” of energy efficiency,” said Allison Walker, Chairman, CEO, The Lighting Quotient. “Our business is now not only innovative in our lighting solutions, but also innovative in embracing a green workplace, and this message is carried into the community by our employees.”

“There’s a large educational aspect to all of this, and it’s important to get local businesses engaged in energy-efficient products and solutions,” said Walker. Energize Connecticut educated us and worked with us to help our business operate more sustainably, and we do the same for businesses we work with. It’s a win-win partnership.”

Due to the capital investment often needed for high-efficiency systems, companies find it difficult to become energy efficient. The Fund offers substantial incentives to help you bridge that gap. And your energy cost savings are immediate and long-term.

**Project:** The Lighting Quotient (West Haven)  
**Fund Incentive:** \$87,040  
**Projected Energy Savings:** \$36,000 annually
